

## **Designing a Great Quilt Border**

Joanne Thomas and Trina Jahnsen

Saturday, April 28

10:30 am to 3 pm

Village Sewing Center

Want to move beyond a plain border for your quilt? Joanne and Trina will provide insights on evaluating your quilt for an appropriate border and the right fabrics to make the finished product as wonderful as you hoped. They will help with the often mysterious process of doing the math to ensure the chosen design will fit the quilt, and the quilt will be square.

Joanne and Trina will bring examples of quilt tops that need borders, and invite all participants to bring a UFO needing help. In smaller groups our already talented quilters will come up with border ideas, and share them with the entire group.

For this class you only need to bring any UFO needing a border, and a notepad so you can jot down ideas and the math techniques.
